

INDUSTRIAL

Biogas plant cleaning

Properly cleaning an anaerobic digestion plant is important for smooth operation and to retain the plant's value. This involves cleaning the storage facilities for the substrate, the fermenter and other process tanks and equipment. AEKS is providing classic tank cleaning services and no-man entry robotic cleaning system for effective and safe cleaning of storage tanks and confined spaces. Our highly skilled technicians and controlled environments ensure consistent quality and compliance to industry and customer-specific standards. AEKS provides unique solutions that minimizes hazards, ensures a safe work environment, reduces downtime and overall cost.

ACTIVITIES

- Fermenter cleaning
- Mix system cleaning
- Heat exchanger cleaning
- Digester cleaning
- Pipeline cleaning

EQUIPMENT

- Robotic system
- Suction excavator/sauggbager
- Autonomous oxygen supply system
- Ventilation
