

# HEALTH & SAFETY

## Safety – Core value

As the contractor and service provider of choice, AEKS d.o.o. manages health and safety activities to ensure our internal, contractual and regulatory requirements are met.

With safety as one of our core values, the Company is committed to:

- Develop and maintain an health and safety culture and incident-free operations based on our mission zero principles;
- Build a proactive working enviroment where employees feel empowered and obligated to stop any job wh ere unsafe work behaviors or unsafe conditions are observed;
- Identify and assess to control, eliminate or mitigate health and safety risks at our worksites;
- Practice honesty, integrity, transparency and openness as the cornerstone for continual improvement;
- Comply with all regulatory, contractual, local and legal requirements related to health and safety issues;
- Seek employee input, engagement and full participation to encourage and foster an open, safe and supportive workenviroment;

To meet these objectives, the Company has established a health and safety system for identifying, assessing and mitigating risk such as ISO 45001 and SCCp.

AEKS d.o.o. is committed to the continuous improvement of the health and safety management systems and is committed to include consultation and participation of our workers to improve the workplace.
