

INDUSTRIAL

Chemical & mechanical cleaning

AEKS has been providing specialised chemical and mechanical cleaning services of tanks, process piping and equipment for over 30 years to a wide range of industries including Oil&Gas, Petrochemical, Pharmaceuticals, Food&Beverages, Aeronautic, Automotive, Power plants and Paper Mills. During all works, special attention is given to work safety and fire protection. Our pre-operational cleaning processes remove surface contaminants from manufacturing, fabrication and installation. Our maintenance cleaning processes remove scale, fouling due to plant operations, restores flow capacity, heat transfer efficiency, equipment reliability and product quality. AEKS provides unique solutions that minimizes hazards, ensures a safe work environment, reduces downtime, waste volume and overall cost.

ACTIVITIES

- High pressure water jetting
- Tank and vessel cleaning
- Heat exchanger cleaning
- Sewerage and drainage cleaning
- Pipeline cleaning

EQUIPMENT

- Special ADR vacuum suction trucks
- High pressure pumps – 3000 bar
- Chemical resistant pumps
- Mobile tricanter
- Robotic cleaning system
